Psychiatry

One in three people suffer from a psychological disorder at some point in their lives.

Many sufferers do not seek help despite the devastating effects of these illnesses. We assist our patients in understanding that their conditions can be relieved through a number of very effective treatments.

Looking beyond the symptoms, we treat every client as an individual with a unique personality and set of circumstances that affect their conditions. Together, we will plan the most suitable path towards healing. Once the journey begins, we are with you every step of the way to help you lead a happier and healthier life.

You can place your trust in our expertise. You will find our consultations confidential, relaxing and stress-free in a comfortable and professional environment.

Don't suffer in silence when the key to getting your life back is simply a phone call away. [CALL US 713 457 4372](tel:7134574372)

Patient Centered Approach

Kinghaven Counseling Group offers a variety of psychiatric services based on individual and/or family's specific needs. We provide each client with an individualized plan to help reach their optimal level of health and function in life.

Professional Team

Our Professional team includes:

Board Certified Psychiatrists— who are physicians and mental health professionals, who are best qualified to distinguish between physical and psychological causes of both mental and physical distress.

Board Certified Nurse Practitioners— who are Registered nurses (RN) with advanced training in diagnosing and treating mental illness.

Nurse Practitioners (NPs) who prescribe medications, treat illnesses, and administer physical exams. NPs differ from physicians in that they focus on prevention, wellness, and education.

Physician Assistants are healthcare practitioners who will obtain patient histories, perform physical examinations, diagnose illness and develop treatment strategies, order and interpret lab tests, counsel patients on preventative health, and prescribe meds

under
